

# Sika® PowerCleanAid

Cleaning aid for glass surfaces and removal of contamination

## Technical Product Data

Base	Open pours, expanded melamine resin
Color	White
Density	9.5 kg/m <sup>3</sup> approx.
Application method	Ideally to be used with Sika® CleanGlass
Shelf life	36 months

### Description

Sika® PowerCleanAid is a smart cleaning aid based on melamine foam that is usually used in combination with Sika® CleanGlass. It is designed to remove contamination that cannot be sufficiently taken off with standard cleaners or without scratching the surface. Already during the treatment with Sika® PowerCleanAid the cleaning effect is recognized.

Sika® PowerCleanAid is manufactured in accordance with ISO 9001 / 14001 quality assurance system and the responsible care program.

### Areas of Application

Sika® PowerCleanAid is designed for the removal of contamination on Aftermarket Glass Replacement substrates, e.g. usually ceramic frits or glass.

It can also be used for the removal of label residues and other kinds of pollution.

### Method of Application

Use Sika® CleanGlass or an equivalent non antistatic glass cleaner to wet the surface and detect contamination. Use Sika® PowerCleanAid and start scrubbing the bond area. Sika® PowerCleanAid is designed for single use application only.

Surfaces must be allowed to dry completely before the next step in surface preparation (e.g. application of Sika® Aktivator PRO) is performed.

This product is to be used by professional experienced technicians only. If this product is used for other applications than Aftermarket Glass Replacement, trials must be carried out prior to use.

*\* This product is currently in the field test phase and has not been finally released. Technical data stated herein is based on preliminary testing and experience and is subject to change. Product is only suitable for experienced users and only after suitable pre-testing. Subject to mandatory legal provisions, Sika's liability is limited to the replacement of the defective products.*

### Important Note

Compatibility with the current substrate is to be verified prior to the application. Before applying Sika® PowerCleanAid to sensitive surfaces (e.g. plastics, etc.) it is recommended to test Sika® PowerCleanAid on a small, possibly non-visible area of the base material. Before application of adhesive, the surface has to be pre-treated according to Sika's surface preparation recommendations.

- Safety Data Sheet

### Packaging Information

Box	24 pieces
-----	-----------

### Value Bases

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

### Health and Safety Information

For information and advice regarding transportation, handling, storage and disposal of chemical products, users shall refer to the actual Safety Data Sheets containing physical, ecological, toxicological and other safety-related data.

### Legal Notes

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
